

PMA-LINER SYSTEM

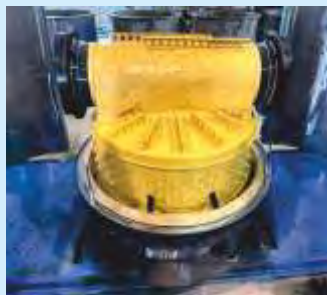

COMPLETELY CORROSION-PROOF SYSTEM

PMA-LINER WITH PP-CORPROTECT FULL LINING

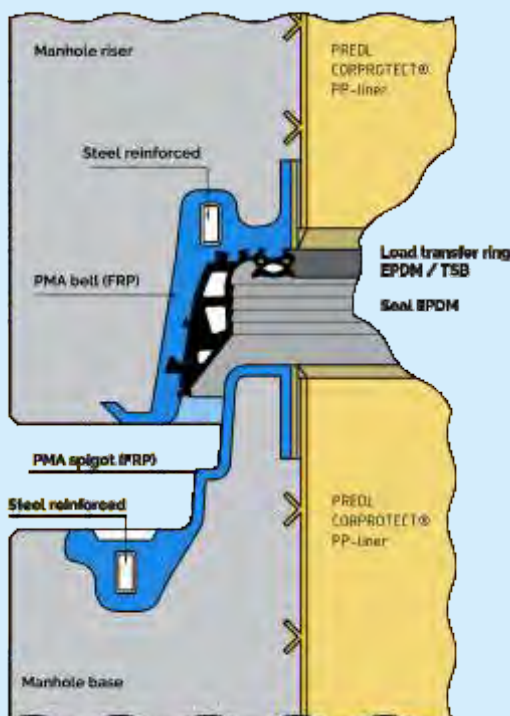

PREDL manhole base-liners and concrete have always been the ideal combination. The PMA-Liner from PREDL, in combination with the PP-CORPROTECT full lining, enables a **completely corrosion-protected manhole system including joint lining with an integrated sealing system and load transfer according to DIN4034 Part 1.**

CONVINCING ADVANTAGES

- highest resistance to **damage caused by biogenic sulfuric acid corrosion**
- NO joint sealing necessary on construction sites
- **reinforced joint structure**
- also for rehabilitation through replacement
- PP-CORPROTECT-liner Wall thickness **3 mm**
- quick and easy assembling
